PMSM technology for better efficiency and performance

The EFL252X3 adopts permanent magnet synchronous motor (PMSM) technology to deliver longer battery life. This efficiency optimization motor brings better energy savings and maximizes the battery uptime at optimal working scenarios by 10% comparing to regular motors.

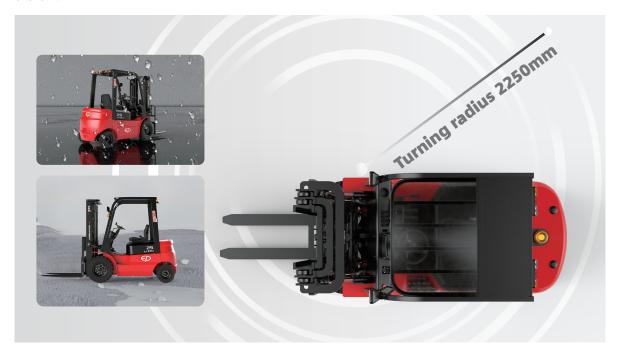

Removable Li-ion battery offering convenience for daily usage

The EFL252X3 is designed around the advantages of lithium technology, equipped with removable 80V/150Ah Li-ion battery as standard and bigger battery up to 80V/280Ah as option. It allows for not only opportunity charging and zero maintenance, but also being laterally pulled and replaced easily, which makes it a helper for rugged environments that lack of charging facilities.

All-rounder for both indoor and outdoor usage

The compact EFL252X3 features a small turning radius 2250mm, and its agility ensures handling capacities in tight spaces and narrow aisles. Besides, the EFL252X3 is water-protected and can be operated outdoors, even in the rain.

Ergonomic zone for fatigue-free work

The EFL252X3 comes offers a spacious workspace, with a simplified panel, an adjustable steering wheel and a comfortable pedal. All are designed in line with ergonomic considerations for operation comfort.
